

# Aldventure

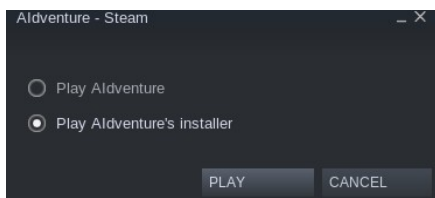

## How to discover the game

Aidventure has many options and might be overwhelming the first time you try it! But fear not, this guide is here to help you!

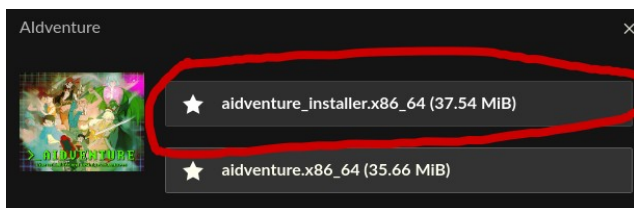

### 1. Download the game

### 2. Run the installer

On Steam choose “*Play Aidventure’s installer*” option first

On Itch.io choose “*aidventure\_installer.[exe/x86\_64]*”

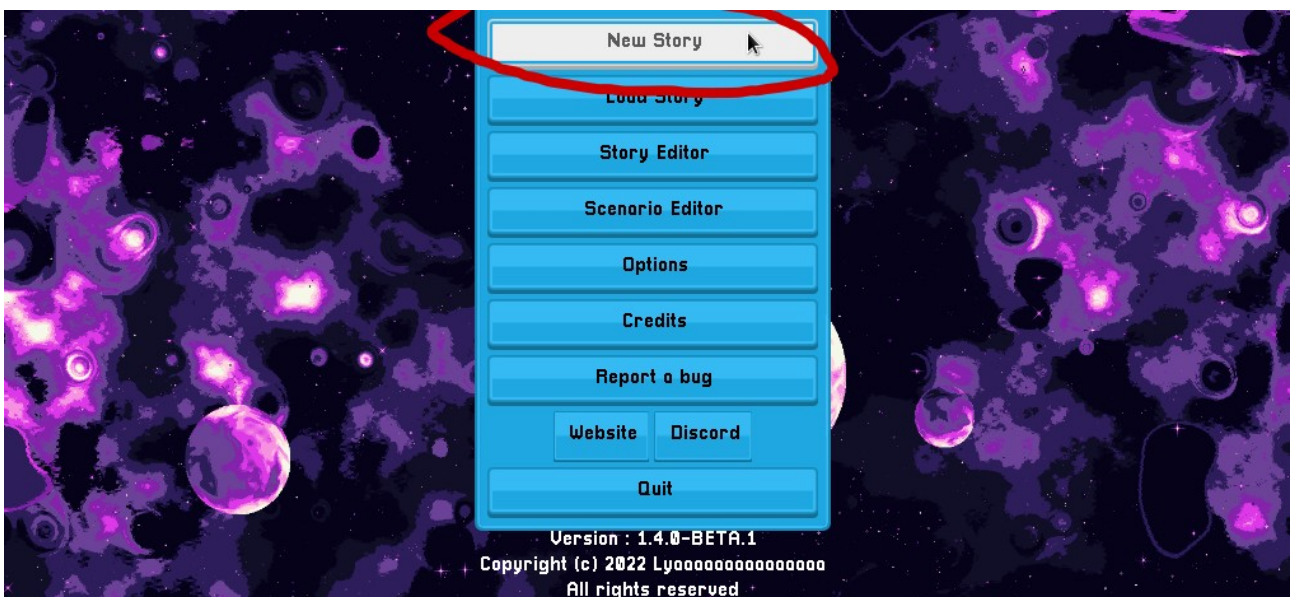

### 3. In the installer click on “Install the game”

The installation downloads a few GB. Depending of your connection it might take 10 minutes or a few hours.

### 4. Now start a new game by clicking on “New Story”

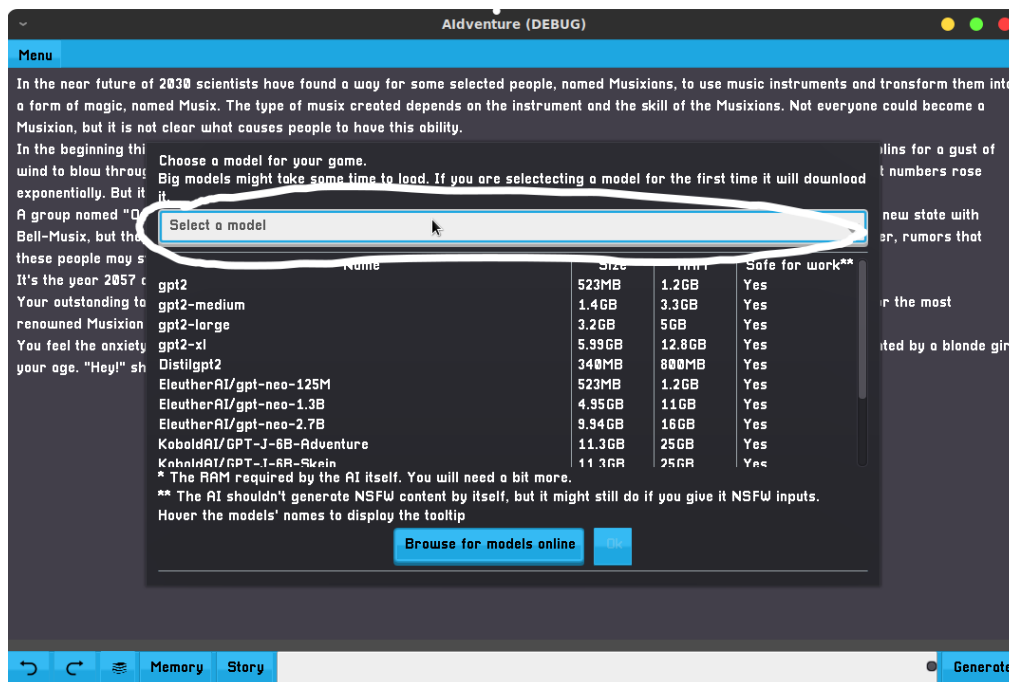

1. Select the scenario you would like to play
2. Create your character's stats
3. Name your game

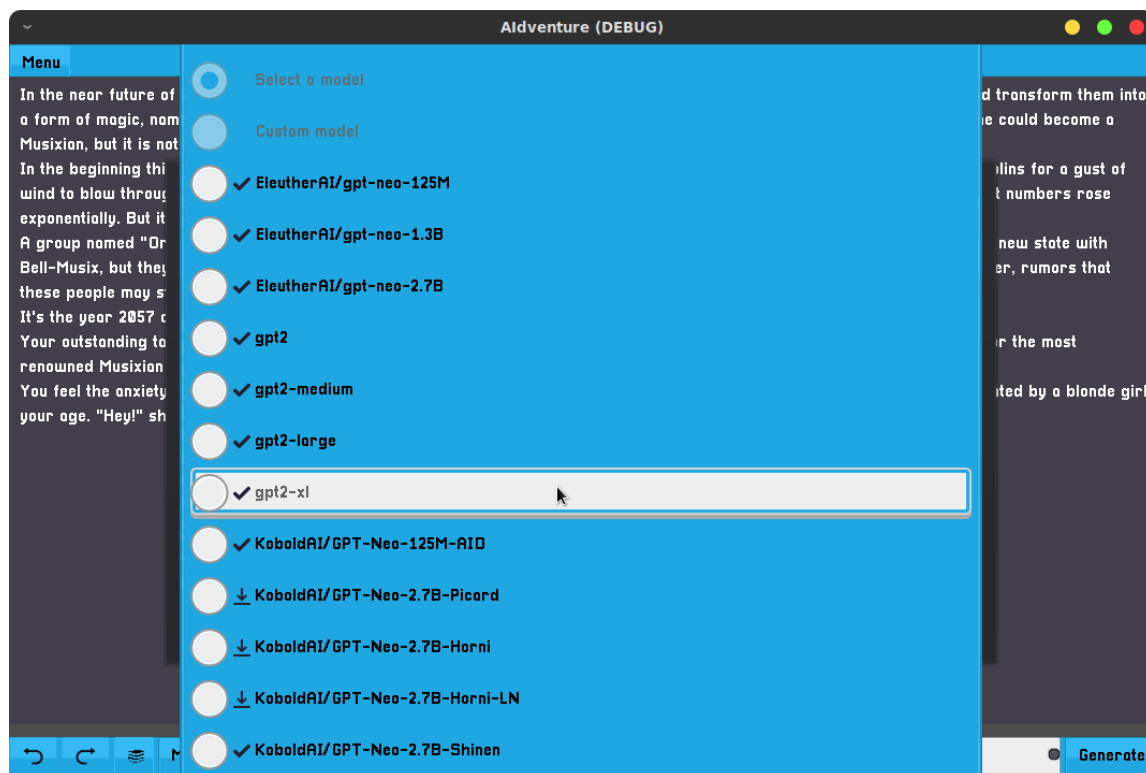

Lyooooo  
Games

## 5. Select your AI

You will be offered a large choice of AIs. It might be hard to choose one. Click on the “**Select a model**” button

Now choose the **gpt2-xl** or **gpt2-large**. If the game version is > to the 1.3.2 you should require 6GB or RAM to run the gpt2-xl and only 3GB for the gpt2-large. If the version is <= to the 1.3.2 they will require 12GB for the xl and 6GB for the large.

## 6. Play the game

You can now have fun and write anything you want. Enjoy.

## About

AIdventure is available to purchase on Itch.io [[Link](#)] and Steam [[Link](#)]. Join the community on Discord [[Link](#)] and Reddit [[Link](#)]!
